

The lotus® PRO End User List

The patented lotus® PRO cleaning and sanitizing equipment turns ordinary tap water into the world’s most effective 100% chemical-free commercial cleaner and sanitizer by infusing it with ozone. The aqueous ozone eliminates germs, odors, stains, mold, mildew, fungus and other contaminants on any item or surface before changing back into water and oxygen. Leaves no residues behind. Perfect for mop buckets, carpet extractors, auto-scrubbers and spray bottles. Eliminate cleaning chemical costs. Reduce health and safety risks, accidents & lost-time claims, carbon footprint, storage space. Increases floor traction and more.

The lotus® PRO High Capacity Unit is installed in facilities such as:

Schools / Universities

- Michigan State University, MI
- University of Michigan, MI
